

## Lecture Videos on Aspiration Cytology

| Sr. No. | Topics                                                                                     |
|---------|--------------------------------------------------------------------------------------------|
| 1.      | Introduction to FNAC: Technique, RAPID ON-SITE EVALUATION and Approach to Cytomorphology-1 |
| 2.      | Introduction to FNAC: Technique, RAPID ON-SITE EVALUATION and Approach to Cytomorphology-2 |
| 3.      | Aspiration Cytology of Breast-1                                                            |
| 4.      | Aspiration Cytology of Breast-2                                                            |
| 5.      | Aspiration Cytology of Thyroid-1                                                           |
| 6.      | Aspiration Cytology of Thyroid-2                                                           |
| 7.      | Aspiration Cytology of Lymphnode-1                                                         |
| 8.      | Aspiration Cytology of Lymphnode-2                                                         |
| 9.      | Aspiration Cytology of Lymphnode-3                                                         |
| 10.     | Aspiration Cytology of Salivary Gland -1                                                   |
| 11.     | Aspiration Cytology of Salivary Gland -2                                                   |
| 12.     | Cytology of Skin lesions and superficial soft tissue – Part 1                              |
| 13.     | Cytology of Superficial Soft Tissue Masses (Part Two)-Head and Neck                        |
| 14.     | Cytology of Soft Tissue Tumors – Preanalytical Basics and Cytomorphology Concepts          |
| 15.     | Cytology of Soft Tissue Tumors – Non Neoplastic and Benign Neoplastic Lesions              |
| 16.     | Cytology of Soft Tissue Tumors – Malignant Lesions                                         |
| 17.     | Cytology of Effusion – Preanalytical Basics, Reporting System and Non Neoplastic Lesions   |
| 18.     | Cytology of Effusion – Malignant Lesions                                                   |
