

## PG Histology Slide Set

| Sr. No. | Diagnosis                                                                  |
|---------|----------------------------------------------------------------------------|
|         | <b>Epithelial Tissue</b>                                                   |
| 1.      | Adenosquamous Carcinoma Larynx-IHC-CK-7 (H-5859-22)                        |
| 2.      | Cilia-Nasal polyp                                                          |
| 3.      | Keratinized stratified squamous epithelium - Thin skin                     |
| 4.      | Microvilli JEJUNUM-                                                        |
| 5.      | Non-keratinizing squamous epithelium lining cervix                         |
| 6.      | Olfactory Mucosa(Ciliated pseudostratified Columnar Epithelium,Nose) (GH-5 |
| 7.      | PanCK Perianal Poorly differentiated Carcinoma IHC (H-3903-20)             |
| 8.      | Parakeratotic epithelium-Pityriasis Rubra Pilaris (H-5690-22)              |
| 9.      | pseudostratified ciliated columnar epithelium-trachea                      |
| 10.     | Secretory Epithelium COLON                                                 |
|         | <b>Connective Tissue</b>                                                   |
| 1.      | Adipose Tissue (5231-15)                                                   |
| 2.      | Brown Adipose Tissue (HIBERNOMA) (5003-18A)                                |
| 3.      | Dense Collagenous Tissue                                                   |
| 4.      | ELASTIC TISSUE SKIN(6727-18)                                               |
| 5.      | Fibrous tissue in angiofibroma skin (2435-24)                              |
| 6.      | kidney-reticulin stain                                                     |
| 7.      | Loose Areolar Connective Tissue                                            |
| 8.      | Myxoid tissue-umbilical cord human t.s                                     |
| 9.      | spleen-Reticular Fibres                                                    |
| 10.     | TENDON (GH 11B)                                                            |
|         | <b>Muscle Tissue</b>                                                       |
| 1.      | Cardiac Muscle - GH16                                                      |
| 2.      | Cardiac muscle (GH162)                                                     |
| 3.      | CARDIO-ESOPHAGEAL JUNCTION - 2                                             |
| 4.      | Desmin-Rhabdomyosarcoma(698-17)                                            |
| 5.      | Masson Trichrome                                                           |
| 6.      | myocardial infarction healed                                               |
| 7.      | skeletal muscle - EPIMYSIUM(T.S.)                                          |

|     |                                                                  |
|-----|------------------------------------------------------------------|
| 8.  | skeletal muscle (C.S.)                                           |
| 9.  | SMA Inclusion Body Fibromatosis-IHC (6823-17)                    |
| 10. | Smooth Muscle                                                    |
|     | <b>Bone and Cartilage</b>                                        |
| 1.  | Bone - T.S                                                       |
| 2.  | Cancellous Bone L.S(GH157)                                       |
| 3.  | Compact Bone - L.S,-GH144                                        |
| 4.  | Compact Bone T.S (GH145)                                         |
| 5.  | ELASTIC CARTILAGE                                                |
| 6.  | ELASTIC CARTILAGE (GH13A)                                        |
| 7.  | ELASTIC CARTILAGE-13C                                            |
| 8.  | FIBROCARILAGE / Muroid cartilage (WHITE CARTILAGE)               |
| 9.  | Ground Section Bone                                              |
| 10. | Hyaline Cartilage                                                |
| 11. | membranous Ossification (gh116)                                  |
| 12. | SYNOVIUM (3107-18)                                               |
|     | <b>Blood Vessels</b>                                             |
| 1.  | Aorta-Elastic Artery                                             |
| 2.  | Artery                                                           |
| 3.  | Capillaries in Hemangioma                                        |
| 4.  | CD31 HEMANGIOENDOTHELIOMA TONGUE-IHC(H-404-21)                   |
| 5.  | ELASTIC FIBRES-VERHOFF AORTA                                     |
| 6.  | Large Artery/Aorta                                               |
| 7.  | large Vein                                                       |
| 8.  | Liver                                                            |
| 9.  | Medium VEIN (GH22)                                               |
| 10. | Muscular Artery - GH21                                           |
| 11. | SMA Glomus tumor nail-IHC (89c-14)                               |
|     | <b>Lymphoreticular Tissue</b>                                    |
| 1.  | CD20 NON-HODGKINS LYMPHOMA-IHC (5391-19)                         |
| 2.  | CD3 Nasopharyngeal T-Cell Non-Hodgkins Lymphoma-IHC- (h-2932-21) |
| 3.  | Lingual Tonsil                                                   |
| 4.  | lymphnode                                                        |
| 5.  | Palatine tonsil                                                  |

|     |                                                  |
|-----|--------------------------------------------------|
| 6.  | Peyer Patches ILEUM                              |
| 7.  | spleen                                           |
| 8.  | thymus                                           |
|     | <b>Exocrine Glands</b>                           |
| 1.  | Apocrine Glands (1062-18)                        |
| 2.  | LACRIMAL GLAND                                   |
| 3.  | MUCIN SECRETING GLAND-1 (OH5) R-1                |
| 4.  | MUCIN SECRETING GLAND-2 (OH5) R-2                |
| 5.  | Panck angiosarcoma parotid gland - (or 116-2013) |
| 6.  | pancreas                                         |
| 7.  | Parotid Gland (4505-20 D) - 2                    |
| 8.  | SEBACEOUS GLANDS SCALP SKIN                      |
| 9.  | SEBACEOUS GLANDS-THIN SKIN                       |
| 10. | Sublingual salivary gland                        |
| 11. | sweat glands-Thin Skin(GH30A)                    |
| 12. | Thick skin- SWEAT GLANDS                         |
|     | <b>Endocrine Glands</b>                          |
| 1.  | Adrenal gland (0394-13)                          |
| 2.  | Islets of Langerhans, Pancreas                   |
| 3.  | parathyroid gland                                |
| 4.  | PITUITARY GLAND                                  |
| 5.  | thymus                                           |
| 6.  | Thyroid Gland                                    |
|     | <b>Integumentary System</b>                      |
| 1.  | Apocrine Glands (1062-18)                        |
| 2.  | EYELID-GH70                                      |
| 3.  | Fontana Masson Stain (LPL-B-2167-25)             |
| 4.  | Meissners Corpuscles skin (3175-18) gh28         |
| 5.  | Nail-Ossification bone                           |
| 6.  | nipple with areola                               |
| 7.  | Pacinian Corpuscles (5828-17)                    |
| 8.  | SEBACEOUS GLANDS SCALP SKIN                      |
| 9.  | SKIN                                             |
| 10. | sweat glands-Thin Skin(GH30A)                    |
| 11. | Thick skin- SWEAT GLANDS                         |

|     |                                                               |
|-----|---------------------------------------------------------------|
| 12. | Thin skin                                                     |
|     | <b>Digestive System</b>                                       |
| 1.  | Anal canal (235-13)                                           |
| 2.  | ano-rectal junction                                           |
| 3.  | Appendix (5553-16)                                            |
| 4.  | CARDIO-ESOPHAGEAL JUNCTION - 2                                |
| 5.  | CDX2 Port Site Carcinoma Gall Bladder- IHC(3831-16)           |
| 6.  | CK20 Signet Cell Carcinoma Colon-IHC- (8191-17A)              |
| 7.  | DUODENUM (GH50)                                               |
| 8.  | Esophagus (GH31)                                              |
| 9.  | Fundus Stomach                                                |
| 10. | Jejunum--small int                                            |
| 11. | Large Intestine                                               |
| 12. | Peyer Patches ILEUM                                           |
| 13. | Pyloroduodenal Junction (4281-22 B)                           |
| 14. | stomach pylorus-2                                             |
| 15. | STOMACH-FUNDUS (GH32B)                                        |
|     | <b>Liver, Gall Bladder, Pancreas</b>                          |
| 1.  | Gall bladder                                                  |
| 2.  | Islets of Langerhans, Pancreas                                |
| 3.  | Liver - human                                                 |
| 4.  | Normal Gall Bladder (1712-22)                                 |
| 5.  | pancreas                                                      |
| 6.  | Port Site Carcinoma Gall Bladder-IHC-CDX2 (3831-16)           |
|     | <b>Urinary System</b>                                         |
| 1.  | - Prostatic Urethra                                           |
| 2.  | KIDNEY                                                        |
| 3.  | Kidney-Juxtaglomerular apparatus and medulla                  |
| 4.  | Transitional Epithelium                                       |
| 5.  | transitional epithelium of collapsed urinary bladder-gh65 new |
| 6.  | ureter                                                        |
| 7.  | Urinary bladder-                                              |
|     | <b>Male Genital System</b>                                    |
| 1.  | - Prostatic Urethra                                           |
| 2.  | Bulbourethral Gland GH66(A)                                   |

|     |                                                     |
|-----|-----------------------------------------------------|
| 3.  | Epididymis-93-2                                     |
| 4.  | penile urethra                                      |
| 5.  | Penis                                               |
| 6.  | Penis T.S                                           |
| 7.  | prostate                                            |
| 8.  | rete testis and epididymis with testis (5427-20)    |
| 9.  | SEMINAL VESICLE                                     |
| 10. | Spermatic Cord (4787-20 D)                          |
| 11. | Testis (4097-20 B)                                  |
| 12. | Testis (4097-20 B)                                  |
